

QUALITY IN QUANTITY

EST. 1897

2:00 p.m. saturday MARCH 9 TH 2022

Pleasant Dawn Charolais

Dear friends and customers,

Ashley and I, with our entire family, would like to invite you to our 20th Annual Bull Sale. Together, this year we are privileged to celebrate Pleasant Dawn Farms 125th anniversary.

Hugh Hatch was born December 3, 1805, in Devonshire, England, and came to Montreal in 1840. His son, Henry, came to Manitoba in 1882 with his family. In 1897, my Grandfather's father, William Livingston Hatch, established our homestead. It's such a blessing how Ashley and I and our family get to celebrate these present fruits of their hard work and labor!

This 20th year, of our annual sale, has some exciting and promising prospects to add to your herd! Your comments on the bulls and how the calves perform really make me want to produce an even more profitable product for you! Profitably is always #1 and it starts with calving ease.

Based on our birth weights and EPDs they are breed leaders. Early gestation is so important and heritable. A small calf born full term is usually a smaller calf in the fall, but a smaller calf from early gestation can still give top performance. This is one way we have achieved below average BW and above average performance and the EPDs to correlate with the stats. The bottom line is beef performance

and pounds pay customers and our bills. Pounds sell but quality pounds sell better! Quality in Quantity was a motto my grandfather started and Quality in Quantity is a must for us. Our cattle achieve more pounds with extra length of spine and a good quarter and that doesn't hurt calving ease.

Longevity is a must in our program, with many females and bulls lasting over a decade. Check out our EPDs and you'll find many are below average for birth and above average for performance and maternal traits. These bulls are backed by generations of seed stock with these traits to give you the most consistent profitable product.

I always enjoy your phone calls or messages, so feel free to contact me anytime, or stop by to check the bulls out in the pen.

Trent

The 20th Annual sale is proof of a program's longevity, and in this case, living their slogan where "Customer Satisfaction is Our Goal." For over 40 years, Charolais have been at Pleasant Dawn, where they strive to breed functional, maternal females, that will do a good job raising their calves on the marsh grass pastures. The bulls produced from this program are good calving, structurally sound, with good performance, great EPDs and excellent dispositions.

As you go through the catalogue, you will see that many of the bulls are sired by Pleasant Dawn bulls. Many of these bulls were sold, but they retained semen to continue the genetic lines. They, in turn, are great outcross genetics backed by decades of selection within their program. Last year, we saw several bulls go into purebred herds, which is a testament to the quality.

All the bulls are polled, and many are tested Homozygous Polled, guaranteeing you all polled offspring from these sires. There were some that were 100K DNA tested to produce a Genomically Enhanced EPD and thus, a higher accuracy to the EPD. They are marked in the catalogue with a GEPD. This year to give you more information on what is under the hide, all the bulls were ultrasound measured, so you can see their Marbling, Lean Meat Yields and Ribeye area. From bulls that would work in the heifer pen, to performance bulls that will give your calf crop the added performance you desire, come to have a look.

The sale is a video sale, held in their heated shop with the bulls displayed just outside. So come early, as the bulls won't be coming through the ring. You are welcome to come to the farm to view the operation and the bulls anytime.

Like last year, the sale will be broadcast live on By Livestock Online, so if you can't make it to the sale, you can watch and bid online. Go to www.bylivestock.com to register to bid. Be sure to register early if you are using this service.

If Jon, Candace, or I can be of any assistance before the sale, or on sale day, please don't hesitate to give us a call. We would be happy to find you bulls that are right for your program.

Sincerely, Helge & Candace By Jon & Sarah Wright By Livestock

Pleasant Dawn Charolais 20th Annual Charolais Bull Sale

Saturday, March 19, 2022 • 2:00 pm • At the Farm, Oak Lake, MB

Featuring • 66 bulls • All are polled

Sale Day Phones

Trent Hatch cell	204-721-3078
Tully Hatch cell	204-748-7595

Gene Parks, Ring service	.204-729-7118
Andrew Reeleder	.403-848-1260

Semen Testina

All bulls will be semen tested within 30 days of the sale. Scrotal circumferences will be posted at www.pleasantdawn.com and bylivestock.com.

Deliverv

If you are able to bring your trailer on sale day, we will take \$50 off the purchase price of your bull. For delivery immediately after the sale, and for bulls returning to Pleasant Dawn for future delivery, we can deliver your bulls at a cost of \$75 for 200 km. We will work with you on other destinations

No place to put your bull...

We can look after your bull at Pleasant Dawn Charolais at no charge until June 1. We take pride in our animals and do our best to insure their health and safety, but please understand they become your risk at sale time. Bulls kept at Pleasant Dawn are yours as of sale day.

Insurance

Insurance will be available sale day from Keystone Livestock Services, Lois McRae, 204-728-3058 or cell 204-573-5192

Accommodations

The Souris Hotel	204-483-3373
Jay's Inn - Virden	204-748-2223
Countryside Inn - Virden	204-748-1244

Credit Card Purchases

Purchases may be made on Visa or Mastercard. A 4% surcharge will be applied.

Pleasant Dawn 20th Annual Bull Sale

Canadian Charolais Association January 2022

Breed Average EPD CE 5.9 BW .6 WW 45 YW87 M 21 TM 44

Unable to Attend the Sale?

You need not be disappointed. We will select a bull for your program and guarantee you'll like him. Just give us a call.

Video Sale

Videos of the bulls are available online at www.pleasantdawn.com.This is a video sale. Be sure to come early to view all the bulls thoroughly in the pens as they will not be coming through the sale ring.

Advantage of 100K testing

EPDs contain information from an animal's pedigree, performance and possibly DNA (100K Testing) which are directly used to calculate the EPD for that animal in each specific trait. The use of DNA in the EPD calculation allows us to dramatically increase the accuracy of the EPD for animals that have been 100K tested. These Genomically enhanced EPDs allow us to greatly enhance our selection process and better predict the genetic potential of that animal, particularly in your cattle (calves, yearling bulls and heifers) that have no offspring to evaluate.

For example, in the evaluation of an animal's DNA (100K test), it is roughly equivalent to the reporting of:

- 10 offspring from the tested animal when calculating Calving Ease
- 25 offspring from the tested animal when calculating Birth Weight
- 15 offspring from the tested animal when calculating Weaning Weight

• 8 offspring from the tested animal when calculating Yearling Weight So in summary, it goes without saying that if you were selecting a bull for Birth Weight, it would be a lot more predictable to select a bull that already had information on 25 calves than a bull that didn't have information on any calves and only relied on information from his sire and dam and his own birth weight. In this catalogue Genomically enhanced EPDs are designated as GEPD.

Terms & Conditions

The sale will be conducted under the standard Terms and Conditions. Copies will be available upon request when receiving your buyer number.

All buyers will be entered in a draw for a prize!

From a past customer	From a	past cust	omer

There are few certainties in farming, but exceptional quality herdsires from the Hatch family is one. We have used Pleasant Dawn bulls for over 14 years with great success. Our weaning weights continue to increase and our birth weights still remain below 100 lb., largely due to Pleasant Dawn genetics. I love the even temperament and hair coat of their bulls and we have never trimmed a bull's feet.

~ Fred Greig, Avondale Seeds

om a pasi cusiomer...

We run a 120 head commercial cow/calf herd. Since 1990 we have purchased our bulls exclusively from the Hatch family. Their extensive breeding program allows us to choose the bulls we need year after year. Disposition, calving ease, weight gain and customer satisfaction! All good reasons for our repeat purchases. ~ Hainsworth Farms Deloraine, Manitoba

He's out of the great MVP bull, who we've used on heifers and yet still provides top performance. If you're looking for outcross red factor genetics, this guy is full of red meat yield, awesome temperament and has those curve bending EPDs. MVP is deceased and we have just a handful of calves left from him. Don't miss out on a direct son of the great MVP.

These bulls have consistently given us calf crops that have good hair coats and feed well. The bulls themselves have all had good feet and sired mothers that milk.

~ Van Buuren Stock Farm • Pipestone, Manitoba

There has been a lot of ups and downs in the cattle industry, but one thing that remains "solid" is the bulls the Hatch family has to offer. Quiet, good hair coats and calving ease are all attributes that keep us coming back to buy Pleasant Dawn Bulls. We have been buying bulls from Tully and Trent for about 7 years and have never had need to get any of their bulls feet trimmed, which in my opinion means they have a feed program that really works. Also peace of mind on sale day, that they back their bulls like very few in the industry.

~ Wes and Wayne Lamport, Melita, MB

From a past customer...

Kathy and I raise beef for the consumer to enjoy, not cattle for show. We have always rail graded our finished cattle and rely heavy on EPDs. The Hatch family's genetics have been a sound part of our crossbreeding program and has shown positive in our feedlot results. We have been through a few ups and downs in the cattle cycle and found that a solid crossbreeding program that gives us live calves that convert grass to beef and have the gut capacity to perform well in the feedlot will save us money at the end of the day. Until the consumer says they don't like beef, I expect the Hatch's bulls to be part of our herd. If we could sum up our opinion of the Hatch family, it comes down to one word, Trust. ~ Barry & Kathy Routledge Farms, Lenore, Manitoba

From a past customer...

We have a mixed grain and cattle operation here on both our farms. We have purchased nine Pleasant Dawn bulls over the years and we keep coming back because of calving ease, growth, weight gain and overall performance. We keep our own replacement heifers to build a strong foundation in our herds. We truly appreciate the Hatch family's hard work in producing these quality bulls. The after sale service and customer satisfaction are excellent. We are looking forward to seeing the next line of herd sires on sale day, God willing. Thank you Hatch families. Gerald & Sheila Lukin Cory, Shirley, Zachery, Stephanie & Alyssa Lukin Riding Mountain, Manitoba

We have purchased numerous Pleasant Dawn bulls and females over the years. The bulls consistently have good feet and are easy to work with. They calve with ease and have calves with a good hair coat, disposition and they perform well on feed. Customer satisfaction with results keep us coming back. The Hatches are a legend in the Charolais breed.

~ Harmon's 101 Ranch, Glen & Sheila Harmon, Kevin & Jennifer Harmon and family

From a past customer...

Backfat 8.10

Our pasture consists of native grass with rough terrain, including sloughs, rock ridges and lots of bush. Pleasant Dawn bulls have worked extremely well in our pastures, having to cover a lot of acres in a day with our 300 head cow herd. The calves have consistency with calving ease which is a must for our farm. We will definitely continue to buy bulls from the Hatch family. ~Marc & Allison Van De Kerckhove Toutes-Aides, Manitoba

The best heifer bull ever used at Pleasant Dawn. After 2 years, still 100% unassisted and still leaves good performance and muscle.

From a past customer...

We are a mixed grain and cow/calf operation here at Vanbeselaere Farms. We have 5 Pleasant Dawn bulls working for us. We have run a closed beef herd for over 35 years. Keeping our own replacement heifers is an important part of building a strong foundation in the herd. The Tully Hatch family and their bulls are doing just that for us, as well as giving us the pounds to sell in the fall off our last February, March calving cows. The calving ease, growth, depth, width and the disposition of these herdsires is really showing. We have a little ways to go to the vision of what I want our herd to look like. The Pleasant Dawn genetics are sure making this attainable.
